

DUCTFORMER

COIL LINE AUTOBRAKE DB-60 (72)

Made in the USA

*Installs in any
Manufacturers
Duct Coil Line!*

Ductformer's AUTOBRAKE DB-60-(72) is a fully automatic duct braking system that receives a part and bends either Full WRAP duct or L-Sections. The DB-60 (72) can be installed in any manufacturers duct coil line providing duct fabricators the opportunity to upgrade and modernize existing lines. The AUTOBRAKE DB-60 (72) incorporates the latest technology offered by name brand industrial component manufacturers including; PLC technology using Compact flash memory backup, color touch screen operator interface controls, brushless A-C Vector motion control drives for the part feeding, and a pressure compensated hydraulic system.

Features

- Simple color touch screen controls
- Part Data entry in seconds
- Fully functional independent self contained control system integrates into any existing line
- Remote or machine mounted control console options
- AC Vector motion control drives that are powerful and maintenance free

Specifications

- Max Blank length 125"
- Min. Blank Length 12"
- 60" (DB-60) or 72" (DB-72) MAX width
- Min L section 4x8
- Min. wrap 6"x6"
- Widths 44-56-68" TDFC/ 48-60-72" Slip & Drive
- Cycle time— 30 seconds full wrap duct
