

DUCTFORMER

DUCTFORMER LINE-A-DUCT DL-60 or 72

- Process 48,60,72" coil widths
- 1/2" to 2" liner, TDC Slip and Drive and Raw edge
- Extrudes glue adhesive
- Cuts insulation material to length
- Load 2 rolls of insulation

Made in the USA

DUCTFORMER LINE A DUCT DL-60 (or 72) is designed to be installed in any manufacturers duct coil line system. Glue is first applied to metal, the liner is cut to the exact length and pressed on to the part. A weld pin system (not pictured) installed after the DL-60 (or 72) would pin the liner to the metal after insulation has been applied.

Features

- Glue extrusion system eliminates overspray and minimizes maintenance
- 2 Insulation rolls mounting
- Variable speed drives allow operator to fine tune
- Common readily available and affordable "off the shelf parts" such as shear blade and pneumatic cylinders
- Installs easily in any manufacturers coil line, perfect for add on or replacement of older systems

Specifications

Material range..... 1/2 -2" liner
Material widths.....44"-60"-72"
Length..... 142"
Working Height.....32"-40"
Width.....(5 ft model).....72"
Air.....PSI 120
.....CFM 3
Voltage.....110 & 220/440
Electrical.....3 Phase / 50/60Hz
